PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING.

THE undersigned are prepared to introduce into use in Tennessee W. E. CHILDS & CO.'S PATENT ELAS TIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Companies, and the public to examine its superiority over other

ARCHITECTS AND BUILDERS should not fail to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth surface that will resist the action of the atmosphere in every ctimate. It is impervious to water, elastic, and flexible It contracts and expands with the changes of the almost there, and will neither evaporate, crack nor rot, and, as to phere, and will neither evaporate, crack nor rot, and, as to its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good heathing, old shingles, tar and gravel, tin, sinc, copper, or iron roofs—it making no difference how steep or flat they may be—for seven dellars per one hundred square feet, it being far themser than any Roof of the old style, and we are sure it.

cheaper than any Roof of the old style, and we are sure it will live better satisfaction. It will also be found to be the best thing ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys, scuttles, dormar windows, and gutters, where the

tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any ob-ject to which it is applied. Tin Roofs can be painted over (and warranted not to leak) at two d flars and fifty cent-per hundred square feet, which is cheaper and much bet-ter than paint. This Roofing will be found to be the best then for covering large doofs where they are exposed to fir —such as Steam Mills, Saw Mills, Factories, Railroad Cars, Bridges. Depots Station Houses, Steamboat Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint In it, it presents no chance for fire to communicate, and any light substance will burn out without igniting.

Insurance Offices at Cincinnati, and other places where Child's & Co.'s Coment has been used, insure Buildings with Roofs covered eith this Coment, at the same rates as for those covered with Iron, Copper or Tin.
The Cement will be furnished to those at a distance with directions for using.

Orders sent to the undersigned, through the Post-

office, will be promptly attended to

OFFICE BUCKETE STATE 'MBURANCE COMPANY, TO ALL WHOM IT MAY CONCERN. This is to certify that have examined specimens and Roofs of W. E. Childs A Co.'s "Elastic Fire and Water Proof ement Roofing," and be lieve it to be eminently superior to any other kind of Roofing in use. I was an eye witness of a severe trial of one of these Roofs from a large volume of flame from an adjoining building, which struck directly spon the roof and cornice for nearly half an hour. It stood the trial beyond all expectation, and saved the building, T. M. HASKELL, President Buckeye State Insurance Co. INCINNATI, Dec. 16, 1856

Having made considerable inquiry as to the merits of the
'Patent Elastic Cement Koofing," introduced into this city
by Childs & Co., I find it to be highly recommended in this
oity by many excellent judges, that it is meeting with very
ready and general introduction, that its superiority over
the tar composition Roofing is decided and freely admitted,
and finally, I expect to adopt it for my nest root, which will
be next summer—having intended to use tin, but will try
the virtues of the "Patent Elastic Roofing" as a substitute,
Yours, truly,
